	Examiner Michael Burleson	Art Unit 2626	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d).

Information Disclosure Statement

2. The information disclosure statement (IDS) were submitted on February 2, 2005 and February 10, 2005. Accordingly, the information disclosure statement is being considered by the examiner.

Double Patenting

1. Claims 1-8 are rejected under the judicially created doctrine of double patenting over claims 1-4,7 and 8 of U. S. Patent No. 6919970 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

Regarding claim 1, the color image transmission system between a pair of computer image processing systems A and B of an image of the present application reads on a method for calibrating color of an image which is transmitted from a computer image processing system A to a computer image processing system B of claim 1 of US 6919970.

Regarding claim 2, a method for calibrating color of a digital image in transmission between a pair of computer image processing systems A and B of the present application reads on a method for calibrating color of an image in transmission from a computer image processing system A to a computer image processing system B of claim 2 of US 6919970.

Regarding claim 3, a method for calibrating color of a digital image in transmission between a pair of computer image processing systems A and B of the present application reads on a method for calibrating color of an image in transmission from a computer image processing system A to a computer image processing system B of claim 3 of US 6919970.

Regarding claim 4, the method for calibrating color of a digital image in transmission between a pair of computer image processing systems A and B of the present application reads on a method for calibrating color of an image in transmission from a computer image processing system A to a computer image processing system B of claim 3 of US 6919970.

Regarding claim 5, the method of calibrating color of a digital image in transmission between systems A and B of the present application reads on the method for calibrating color of an image in transmission from computer image processing system A to a computer image processing system B of claim 7 of US 6919970.

Regarding claim 6, the method of calibrating color of a digital image transmission between systems A and B of the present application reads on a method for calibrating

color of an image in transmission from a computer image processing system A to a computer image processing system B of claim 8 of US 6919970.

Regarding claim 7, the method for calibrating color of a digital image transmitted between said systems A and B of the present application reads on a method for calibrating color of an image in transmission from a computer image processing system A to a computer image processing system B of claim 4 of US 6919970.

Allowable Subject Matter

2. Claims 1-8 would be allowable the double patenting rejection is overcome.
